PROFESSIONAL SUMMARY

Data Analyst skilled in SQL, Python, Power BI and Excel, with hands-on project experience identifying trends and extracting actionable insights from supply chain, retail, customer churn and HR datasets. Experienced in data cleaning, exploratory analysis, and dashboard development B.Sc. Information Technology graduate with 83.6%.

TECHNICAL SKILLS

Programming & Querying: Python (Pandas, NumPy, Matplotlib), SQL, MySQL
Data Visualization & BI: Power BI (Power Query, DAX, Data Modeling), Excel (Pivot Tables, VLOOKUP, IF, SUMIF, COUNTIF)
Web & Development: React, JavaScript, REST APIs (Internship Experience)
Tools: Jupyter Notebook, Git, GitHub

PROJECTS

Global Supply Chain & Inventory Intelligence | *SQL, Python, Power BI* | GitHub

- Identified a 57.29% late-delivery rate among non-cancelled orders across 180,519 supply-chain records, highlighting delivery reliability challenges.
- Compared delivery performance by mode, revealing air transport as faster but costlier compared to ocean and road.
- Designed comprehensive Power BI dashboards visualizing delivery timelines, inventory levels, and order profitability KPIs to aid supply chain monitoring and prioritization.

Retail Superstore Sales Analysis | *SQL, Python, Power BI, Excel* | GitHub

- Identified that Office Supplies contributed 45% of total sales across 9,994 transactions.
- Revealed that the West region consistently generated the highest sales with steady quarterly sales growth.
- Developed interactive Power BI reports to analyze sales and profit variations by product category and region, supporting targeted marketing and inventory planning.

Customer Churn Analysis | *MySQL, Power BI* | GitHub

- Calculated an overall churn rate of 26.54%, identifying month-to-month subscriptions and customers with less than one-year tenure as higher churn risk groups.
- Created Power BI dashboards presenting churn segmentation by contract type and customer demographics, enabling visualization to guide retention strategy development.

HR Analytics – Employee Attrition Analysis | *SQL, Power BI* | GitHub

- Quantified employee attrition at 17%, noting elevated turnover among junior-level and low-tenure employees.
- Identified associations between employee attrition, work-life balance and salary satisfaction.
- Delivered executive dashboards summarizing attrition trends and workforce demographics to inform HR retention initiatives.

EXPERIENCE

Front-End Developer Intern | Robomattic (CADD Technologies) | May 2025 – June 2025

- Developed responsive UI components for a video streaming platform using React and JavaScript.
- Integrated RESTful APIs to enable dynamic front-end data access; collaborated closely with backend developers to maintain application functionality and responsiveness.

EDUCATION

B.Sc. Information Technology | PSG College of Arts & Science, Coimbatore | 2023–2026
Percentage: **83.6%**

CERTIFICATIONS

Data Analytics with Python | NPTEL | Introduction to Data Mining | Simplilearn | Power BI Data Modeling with DAX | Simplilearn

LEADERSHIP & ACTIVITIES

- **Executive Member, Entrepreneurship Cell:** Organized mentorship events to encourage student startups and innovation initiatives.
- **Co-founder, Elixor:** Launched a peer learning platform aimed at enhancing skill development among students (early-stage project).
- Participant**, Smart India Hackathon** – Internal Round 2 (participated twice).
- **Institution's Innovation Council (IIC) Student Champion**: Facilitated innovation and entrepreneurship activities on campus.
